# **Andrew Aquino**

### **Frontend Software Engineer**

hi@aqandrew.com

Long Beach, CA

## **Work Experience**

#### Frontend Engineer (Design Technologist) @ Square Jul 2021 - Sept 2023

- Architected and led development on rewrite of a legacy HTML email build system using SvelteKit as a static site generator, leading to 70x faster dev server refresh rates.
- Wrote Node.js script to automate uploading HTML emails to vendor 60x faster than manual form entry.
- Implemented responsive CSS, animations, and Svelte components for international marketing pages on squareup.com.
- Led React pair programming interviews for frontend engineer candidates.

#### UI Engineer @ Chairish

Dec 2020 - Jun 2021

- Extended an existing marquee component to use as a sitewide banner for a new marketing campaign, generating >\$11K in sales on launch day.
- Led an initiative to research and adopt Vite as a build tool, resulting in 36x faster builds for a Django/jQuery ecommerce site's frontend.
- Mentored teammates on accessible HTML and flexbox/grid CSS layouts during development and in code reviews.

#### Freelance Web Developer

Jan 2017 - Present

- Designed and developed a professional profile site for an actor, styled with Tailwind CSS and hosted on Netlify.
- Created an AngularJS drag-and-drop shipping label editor for a screen printing shop that reduced order fulfillment time by 25%.
- Redesigned and developed a public-facing website and logo for an ear, nose, and throat medical practice using Jekyll and the Google Maps API.

#### UX Engineer @ Tallan

Jul 2018 - Jun 2020

- Designed and developed web UI/UX from user flows to interactive prototypes and Angular code, including a chatbot admin platform and a personal finance app, for clients such as Valassis Digital and Experian.
- Led engineering team in user-centric design workshops.
- Built custom reporting data visualizations with D3.js.

#### **Applications Developer Intern @ AT&T**

Jun 2017 - Aug 2017

• Prototyped AngularJS CSS animations on att.com's device recommender page with a goal to convert 40% of device upgrades to online.

#### Software Engineering Intern @ 3M HIS

May 2016 - Aug 2016

• Designed and developed UIs with AngularJS to manage users and visualizations of process log data for an internal dashboard.

## **Open Source Projects**

## Creating a 10-Sided Die with React, Part 1

Interactive blog post about 3D graphics programming with React

#### **FretZone**

Clone of Guitar Pro tab editor with React and React Testing Library

#### svelte-onion

Data visualization + culinary math exploration with SVG/Svelte/D3.js

## **Skills**

#### **Programming languages**

ES6 JavaScript, TypeScript, HTML/Pug, CSS/Sass, GraphQL, Python, C, C++, Java, SQL

#### Frameworks & Libraries

Svelte, React, Redux, Jest, Angular, Node.js, D3.js, three.js, Django, jQuery, Tailwind CSS

#### **Design Tools**

Figma, Sketch, Photoshop, Illustrator, InVision, Zeplin

#### Languages

Proficient in Spanish, familiar with Mandarin Chinese

#### **Education**

#### Rensselaer Polytechnic Institute

Bachelor of Computer Science, 3.4 2014 - 2018

## **Community**

#### Rondalla Club of Los Angeles

Aug 2023

#### **Eagle Scout**

Nov 2013
